

SPORT - MULTIVITAMIN VITAMIN-DRINK-SUPPLEMENTS

The **dry enhancer** is stored in a separate chamber within the cap itself, and is then infused into the bottle when it is twisted. Its development meets the emerging trend towards beverages enriched with vitamins, minerals or probiotics and offers a wealth of opportunities to both beverage manufacturers and retailers. For instance, because the bottom of the cap is hermetically sealed, the closure innovation can be sold either as part of the bottle, or as a standalone refill product.

By keeping the vitamins, anti-oxidants and flavours locked in an airtight cavity, we ensure that they stay fresher for longer, unaffected by water and light.

Simply twist and pop down the cap to break the seal and release the ingredients into the water. A quick shake of the bottle and you're ready to enjoy a tastier, more potent vitamin drink.

SPOR-VITAMIN-DRINK- SUPPLEMENTS VITAMINS, CALCIUM, MAGNESIUM,....

filled with **spring water** or **mineral water**

VIT is a food supplement and a source of 9 vitamins: C, E, B1, B2, B3, B5, B6, B9, B12. One serving contains 50% of recommended daily intake of vitamins.

VIT is prepared right before it is consumed by dissolving multivitamin granules in a glass of water, so it can always provide, in a quick and simple way, a tasty source of vitamins.

VIT is suitable for all age groups, and its presence in millions of households makes it a synonym for a healthy, refreshing, vitamin drink, favoured by everyone.
