

Herbamedica GROUP beverage production

Healthy and Refreshment with push cap system and sachets

Herbamedica Group produces refreshing and healthy beverages with a push cap system and sachets. This innovative packaging includes a separate chamber within the cap to store the dry ingredients, which are infused into the bottle when it is twisted. This design caters to the rising demand for beverages enriched with vitamins, minerals, and probiotics and offers a wealth of opportunities to both beverage manufacturers and retailers.

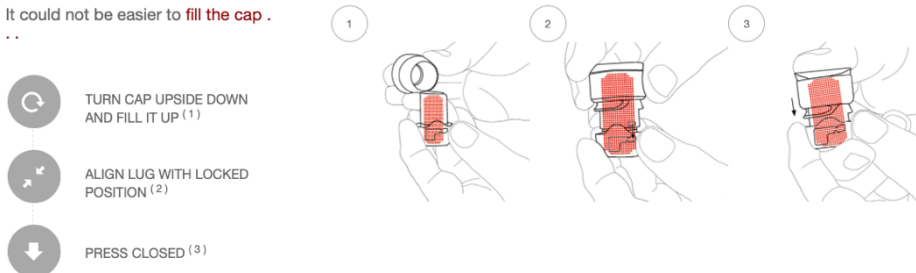

The cap's hermetic seal allows it to be sold as part of the bottle or as a standalone refill product. By keeping the vitamins, antioxidants, and flavors in an airtight cavity, they remain fresh for longer, unaffected by water and light.

Push Caps System

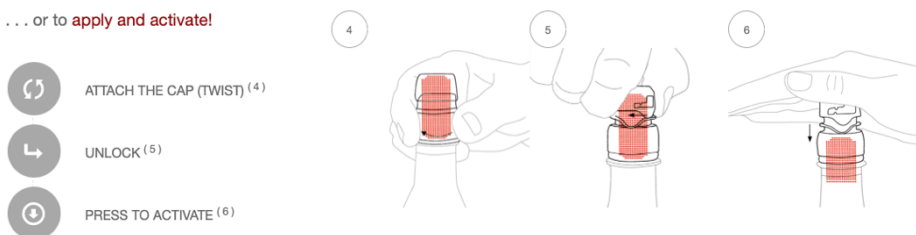

To enjoy the beverage, simply twist and pop down the cap to break the seal and release the ingredients into the water. A quick shake of the bottle and you can savor a tastier, more potent vitamin drink.

It could not be easier to fill the cap .

... or to apply and activate!

Sachets

To use the sachets provided with your refreshment drink, simply follow these steps:

1. Fill a glass or bottle with cold water.
2. Tear open the sachet and pour the contents into the water.
3. Stir or shake the drink to ensure that the powder is fully dissolved.
4. Enjoy your refreshing and tasty drink!

It's important to note that the amount of water you use may vary depending on your personal preference. You can experiment with the ratio of water to sachet until you find the perfect balance of flavor and strength. Additionally, some sachets may contain ingredients that are intended to dissolve slowly over time, so be sure to read the instructions carefully before using them. With a little experimentation and practice, you can create a delicious and refreshing drink that's perfect for any occasion.

- ✓ We will create a product according to your wishes and your logo
- ✓ In production we have a large selection of different flavours
- ✓ Products composed of high-quality and certified raw materials

Best Healthy Drinks & Functional Beverages

Supplement with vitamins 0,25 l Bottle 	Flavours 	Healthy functional 	ORDER
Magnesium	Orange	Magnesium plays important roles throughout the body, including energy release, muscle function, psychological function and maintenance of bones and teeth.	
Magnesium	Strawberry		
Magnesium	Cherry		
Magnesium	Blueberry		
Collagen	Orange	Drinkable collagen products are a bioavailable (easy to absorb) and convenient way to supplement collagen. Collagen helps us retain skin elasticity and hydration. That's why we get wrinkles and sagging skin when our bodies start producing less.
